

The Scanwill MP Hydraulic Pressure Intensifiers in Work Holding applications

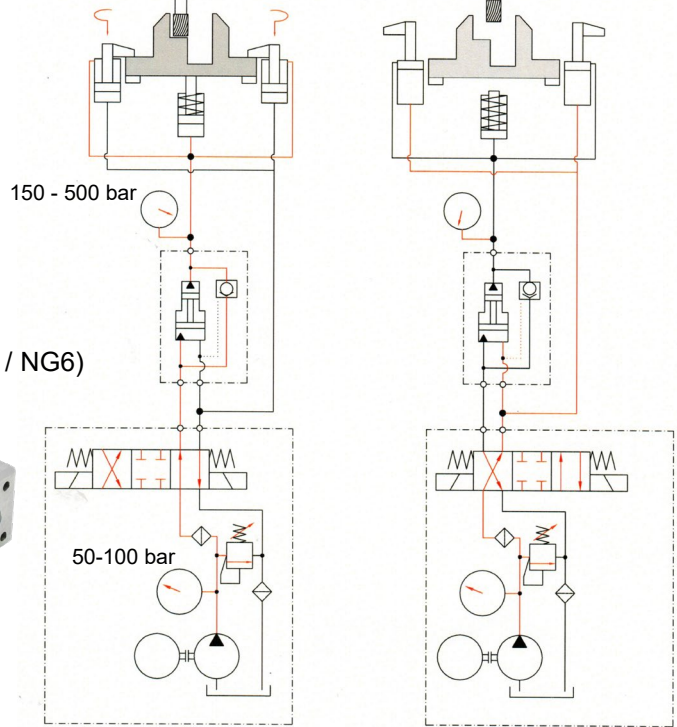

More Pressure. More Power

The Scanwill MP- intensifiers are used to increase the pressure from a machine tool HPU, typically 50 - 100 bar to end pressures in the range 150 - 500 bar

Clamping

Un-Clamping

The MP-T intensifier (In-Line)

The MP- intensifier (cetop / NG6)

The MP-F intensifier (Flange-On)
